

KTH-6001

Ergonomic Crimp Tool With Die Set

Kings products, like the KTH-6001 Ergonomic Crimp Tool with Die Set, are now sold under the Kings-Win™ brand from Winchester Interconnect™.

Product Description

Winchester Interconnect's KTH-6000 is the newest pressmaster® ergonomic hand tool crimper with long handles designed to reduce the risk of injury caused by repetitive crimping operations.

The KTH-6000 Hand Tool features easy-to-grip handles that fit comfortably in your hands and require lower force to cycle the tool.

KTH-6000 is made from hardened steel alloy and will last a minimum of 50,000 cycles.

Currently only available for purchase as Tool and Die Kit – Part #KTH-6001.

- KTH-6002 Die Set crimps our Standard 2065 Series BNC, Long Barrel 2065 Series BNC, and 0345 Series DIN 1.0 / 2.3 Connectors. Die Set contains 5 Hex Sizes to crimp center contacts and crimp sleeves to Belden 1855A, 1505A, and 1694A Cable.
- Ergonomic handle design of KTH-6000 Crimp Tool provides a comfortable fit for the operator's hands and requires less force to crimp.
- Ratchet-release mechanism allows operators to stop the crimping process with a simple quarter-turn. The mechanism is conveniently recessed to prevent accidental release.
